

Children's Health Ireland

Job Specification and Terms & Conditions

Job Title	Locum Consultant Haematologist (Clinical and Laboratory) with a Special Interest in Paediatric Haematology (Malignant)
Campaign Reference	104208
Closing Date	Sunday 18 th October 2026 at 11:45pm
Hours	Children's Health Ireland are seeking to fill this Full-time Consultant post on a specified purpose basis.
Location of Post	Children's Health Ireland (CHI), comprises of the three children's hospitals at CHI at Crumlin, Dublin 12, CHI at Temple Street, Dublin 1 and CHI at Tallaght, Dublin 24 and the Paediatric Outpatients and Urgent Care Centre, CHI at Connolly Hospital, Dublin 15. The new OPD and Emergency Care Unit in Tallaght opened in Nov 2021. CHI's Programme Office, CHI Herberton is located in Rialto, Dublin 8 adjacent to the new children's hospital which is on the campus shared with St James's Hospital. This post will be primarily located in CHI Crumlin.
Context/ Background	Children's Health Ireland (CHI) operates as a single service across the existing Dublin children's hospitals, Crumlin, Temple Street and Tallaght. Also, the paediatric outpatients and urgent care centres, Connolly which opened in July 2019 and Tallaght which opened in November 2021. CHI governs and operates local paediatric services for the Greater Dublin Area and all national paediatric specialist services, some of which are on an all-island basis. • Just under 25% of our population are children under 18 years of age. It was estimated in 2016 that 16% of our children have a chronic disease, such as, diabetes, allergies and asthma and this was increasing. 2% are acutely ill or have complex and multiple care needs requiring national services • CHI currently has a staff of 4,150 delivering care annually to 334,500 children, young people and their families through 39 clinical specialities and 442 in-patient & day care beds

	2019 activity: In-patients 24,500; Day cases 33,500; Outpatients 147,500; ED 129,000 Ireland will have a world class new children's hospital that is purpose built to deliver the best care and treatments that are available for future generations to come. The new children's hospital, which is due to open in 2026 will bring together the three children's hospitals into a world class building on a campus shared with St James's Hospital. This will be a leading campus in healthcare and research in Ireland, a leading adult teaching hospital, a children's hospital and in time, a new maternity hospital, when the Coombe Women and Infants University Hospital is relocated on the campus. CHI is leading on the clinical and operational transformation on how children's healthcare will be delivered in the future to deliver better, safer and more sustainable healthcare in the future. The new hospital is planned as the first 'Digital Hospital' in the system with the implementation of an Electronic Healthcare Record, as well as, other evidence based standards, such as, 100% single rooms. Children's Hospital Programme is a major programme of work led by CHI, focused on transformative service change to enhance services for children, young people and their families, to integrate the three existing hospitals, while maintaining existing and new services, ensuring patient safety and quality until transition is complete. <i>For further information about CHI, check out our recruitment website WWW.CHI.jobs</i>
Reporting Arrangements	Public Only Consultant Contract 2023 states that the Consultant's reporting relationship and accountability for the discharge of his/her contract is: The Chief Executive Officer/General Manager/Master of the hospital (or other employing institution) through his/her Clinical Director
Key Working Relationships	- Clinical Directors across the three Children's hospitals and new Paediatric OPD and Urgent Care Centres. - Clinical colleagues within the cross-city the Haematology department - Clinical Lead for Haematology and Clinical Leads for the other Paediatric and Neonatology Clinical Programme and the Integrated Care Programme for Children - Inter-Disciplinary Teams within the hospitals and at the Paediatric Outpatients and Urgent Care Centre at Connolly

Scope of the Role	The development of a Comprehensive National Paediatric Haematology & Oncology Service at Children's Health Ireland, Crumlin was completed in December 2006. This development was in full agreement with the previous Minister(s) of Health & Children's initiative in this area and it fully incorporated similar recommendations of Comhairle n'Ospideal in respect of tertiary non-malignant paediatric haematology services, including a National Paediatric Haemophilia Programme and a Haemoglobinopathy Service. The greatest advantage of this development has been the opportunity to concentrate the clinical and research & developmental aspects of childhood blood and cancer in a single location. This post is filling a maternity locum, for a Consultant Haematologist with specific expertise in the treatment of children with malignant haematological diagnoses, ad bone marrow failure disorders. The National Paediatric Haematology & Oncology Service also includes the designated National Children's Haematopoietic Stem Cell Transplant (HSCT) unit. The unit performs allogeneic and autologous peripheral blood and bone marrow stem cell transplants for a variety of malignant and non-malignant conditions, using standard and, more recently, reduced-intensity conditioning protocols. It has been the policy of the programme to have all results assessed internationally by the European Bone Marrow Transplant Registry (EBMTR). This has provided an internal audit of the outcome of all patients and all laboratory data. The unit compares favourably to results obtained by other units internationally and is JACIE accredited. Over the past 5 years the HSCT activity at CHI has increased exponentially not only in terms of numbers but also in complexity of the stem cell replacement therapy, making it now one of the biggest paediatric transplant programmes in these islands. The appointee will share responsibility for and will provide senior clinical leadership for the haemato-oncology programme at CHI, crumlin. This will involve HSCT procedures in children and young adolescents requiring stem cell replacement.
Purpose of the Role	The new model of care will deliver on the vision of the National Model of Care for Paediatric Healthcare Services (2016), for the delivery of safe and appropriate care to paediatric patients as close to home as possible so that children and young people with urgent care needs get the right advice at the right place, first time. CHI at Connolly, is the newest unit and as a standalone facility has a requirement for highly skilled supervising consultant presence to ensure a high level of patient safety. The unit is purpose built for Paediatrics and is supported by Skilled Paediatric Nursing and Health and Social Care professionals. Within the Emergency departments and Urgent Care settings the consultants will also oversee the short stay observation model, which helps prevent inpatient admissions and is associated with reduced average length of stay, reduced hospital costs and high levels of parental satisfaction.
Principal Duties and Responsibilities	• To participate in development of and undertake all duties and functions pertinent to the Consultant's area of competence (Malignant Haematology), as set out within the Clinical Directorate Service Plan and in line with policies as specified by the Employer. • To ensure that duties and functions are undertaken in a manner that minimises delays for patients and possible disruption of services. • To work within the framework of the hospital / agency's service plan and/or levels of service (volume, types etc.) as determined by the Employer. Service planning for

	individual clinical services will be progressed through the Clinical Directorate structure or other arrangements as apply. • To co-operate with the expeditious implementation of all HSE/Hospital Policies and Procedures. • To formally review the execution of the Clinical Directorate Service Plan with the Clinical Director / Employer periodically. The Clinical Directorate Service Plan shall be reviewed periodically at the request of the Consultant or Clinical Director / Employer. The Consultant may initially seek internal review of the determinations of the Clinical Director regarding the Service Plan. • To participate in the development and operation of the Clinical Directorate structure and in such management or representative structures as are in place or being developed. The Consultant shall receive training and support to enable him/her to participate fully in such structures. • To provide, as appropriate, consultation in the Consultant's area of designated expertise in respect of patients of other Consultants at their request. • To ensure in consultation with the Clinical Director that appropriate medical cover is available at all times having due regard to the implementation of the European Working Time Directive as it relates to doctors in training. • To supervise and be responsible for diagnosis, treatment and care provided by non Consultant Hospital Doctors (NCHDs) treating patients under the Consultant's care. • To participate as a right and obligation in selection processes for non-Consultant Hospital Doctors and other staff as appropriate. The Employer will provide training as required. The Employer shall ensure that a Consultant representative of the relevant specialty / subspecialty is involved in the selection process. • To participate in clinical audit and proactive risk management and facilitate production of all data/information required for same in accordance with regulatory, statutory and corporate policies and procedures. • To participate in and facilitate production of all data/information required to validate delivery of duties and functions and inform planning and management of service delivery. • Work as part of a team of Haematologists looking after children with Haematological malignancies and bone marrow failure disorders undergoing HSCT. • Participate in on-call with other Malignant Haematologists and Oncologists, approximately 1: 12

Professionalism at CHI		<i>“Professionalism” at CHI involves forming values and developing behaviours and attitudes which foster professional relationships, promote public trust and enhance patient safety.</i> <i>Medicine is a profession in which a doctor’s knowledge, clinical skills and judgement are put in service for the benefit of human health. This purpose is realised through a partnership between patient and doctor, one based on mutual respect, individual responsibility and appropriate accountability.</i> <i>Medical students and doctors should be committed to compassion, effective communication, integrity and honesty, working in partnership with the wider healthcare team/s, advocacy, ethical practice, altruism/selflessness, reflective practice that promotes continuous improvement, evidence based practice, cultural sensitivity and self-care, all culminating in improved child/patient centred service.</i> <i>These commitments aspire to excellence, professional identity formation and leadership.</i>
Our Values	Our values reflect what we all believe will make the most positive difference to the care we offer and to the way we work with one another. By ‘living our values’ we will develop our organisation, our people, and continue to improve the quality of the patient experience in everything we do. The post holder will be expected to embody these values and enable them across the organisation The children and families in our care are at the centre of everything we do. We are... ○ Accountable for our patients’ safety	

	Child-Centred  ○ Great team members ○ Passionate about our purpose Compassionate  We care about our patients, their families and our colleagues. We are... ○ Always kind ○ Aware of our impact ○ Leaders in care Progressive  We provide access to the latest knowledge, innovation and technology for the best patient outcomes. We are... ○ Focused on developing our self and others ○ Always seeking to improve ○ Always looking for innovative solutions
Skills, competencies and/or knowledge	Eligibility Criteria Professional Qualifications and Experience Mandatory: a) Registration as a specialist in the Specialist Division of the Register of Medical Practitioners maintained by the Medical Council in Ireland in the specialty of Haematology (Clinical and Laboratory). <u>And</u> b) One year certified postgraduate training in paediatric haematology. “The successful interviewee must be registered as a specialist in the relevant specialty on the Specialist Division of the Register of Medical Practitioners maintained by the Medical Council of Ireland, within 180 days of the day of interview and before taking up appointment. In exceptional circumstances proleptic appointments may be considered for candidates engaged in relevant training programmes.

The Consultant must, at all times while continuing to hold office, continue to be registered with the Medical Council of Ireland. Documentary evidence of Medical Council Registration is required and must be produced annually to the Medical Administration Department within the Children's Health Ireland.

Should the successful candidate not be registered as a Specialist at that time, the post may be offered to the next suitable candidate. Should no suitable candidate exist, a further recruitment process may be initiated".

- Have excellent computer skills, competencies and knowledge of hospital data/information systems

Health & Safety	These duties must be performed in accordance with the hospital health and safety policy. In carrying out these duties the employee must ensure that effective safety procedures are in place to comply with the Health, Safety and Welfare at Work Act. Staff must carry out their duties in a safe and responsible manner in line with the Hospital Policy as set out in the appropriate department's safety statement, which must be read and understood.
Quality, Risk & Safety Responsibilities	<i>It is the responsibility of all staff to:</i> • Participate and cooperate with legislative and regulatory requirements with regard to Quality, Risk and Safety. • Participate and cooperate with the Children's Health Ireland; Quality, Risk and Safety initiatives as required. • Participate and cooperate with internal and external evaluations of hospital structures, services and processes as required, including but not limited to: • National Standards for Safer Better Healthcare • National Standards for the Prevention and Control of Healthcare Associated Infections • HSE Standards and Recommended Practices for Healthcare Records Management • HSE Standards and Recommended practices for Decontamination of Reusable Invasive Medical Devices (RIMD) • Safety audits and other audits specified by the HSE or other regulatory authorities • To initiate, support and implement quality improvement initiatives in their area which are in keeping with the organisation's continuous quality improvement programme. <i>It is the responsibility of all managers to ensure compliance with regulatory requirements for Quality, Safety and Risk within their area/department.</i>
Specific Responsibility for Best Practice in Hygiene	Hygiene in healthcare is defined as <i>"the practice that serves to keep people and the environment clean and prevent infection. It involves preserving one's health, preventing the spread of disease and recognizing, evaluating and controlling health hazards."</i> • It is the responsibility of all staff to ensure compliance with hospital hygiene standards, guidelines and practices. • Department heads/ managers have overall responsibility for best practice in hygiene in their area. It is mandatory to attend hand hygiene and sharps awareness workshops yearly
Competition Specific Selection Process	The criteria for short listing are based on the requirements of the post as outlined in the eligibility criteria and/or the essential & desirable knowledge, skills and competencies section of this job specification. <u>Failure to include information regarding these requirements may result in you not being called forward to the next stage of the selection process</u>

	To apply for this position, please send a CV and letter of application. The closing date for submissions of CV's and letter of application is Sunday October 18th at 11:45pm. Applications must be completed through the advertised post on CHI.jobs by clicking 'Apply for Job'. Applications will not be accepted through direct email or any other method. Informal Enquiries can be obtained from: Dr. Andrea Malone, Consultant Haematologist in Children's Health Ireland via: Andrea.Malone@childrenshealthireland.ie For other queries relating to this recruitment process, please contact Medical Talent Acquisition specialist, Cillian Greene via: cillian.greene@childrenshealthireland.ie
Panel/s	A panel may be created from which permanent, fixed term and specified purpose vacancies of a full or part time duration may be filled across all Children's Health Ireland locations. The tenure of these panels will be indicated at offer stage.
Information on "Non-European Economic Area Applicants" is available from https://dbei.gov.ie/en/ Children's Health Ireland is legally required to verify that all staff have the right to work in Ireland before they begin employment, regardless of nationality or immigration status. This right-to-work check is also necessary when an individual re-joins CHI or when their immigration permission or employment permit is due to expire. Permit holders can change their permit employer to CHI after a period of nine months has passed since commencing their first employment permit in the State. The change of employer applies to the General Employment Permit (GEP) and to the Critical Skills Employment Permit (CSEP). The change is required to be completed as part of pre-employment clearance. All Permits and Change of Employer applications are processed on the Employment Permits Online. Some recruitment campaigns may be open to candidates who are not citizens of the EEA, Switzerland, or United Kingdom. You can consult the Critical Skills Occupational List see if your profession is currently eligible under this route.	
The programme outlined for Children's Health Ireland may impact on this role and as structures change the job description may be reviewed. Children's Health Ireland is an equal opportunities employer.	

Does the post above identified for filling come within the definition of an Exposure Prone Procedure (EPP) Post?	
YES	☒
NO	☐
Exposure Prone Procedure (EPP) Post Assessment of Post in line with the 'Integrated Guidance on Health Clearance of Healthcare Workers and the Management of Healthcare Workers Living with Bloodborne Viruses (Hepatitis B, Hepatitis C and HIV, 2025)'	
Exposure Prone Procedures (EPPs) are defined in the national guidance as: 'invasive procedures where there is potential for direct contact between the skin, usually finger or thumb of the healthcare worker and sharp objects or surgical instruments – such as needles, sharp body parts (for example fractured bones) spicules of bone or teeth – in body cavities or in poorly visualised or confined body sites, including the mouth of the patient'. All staff hired, transferred or promoted into an EPP post will be required to provide evidence via Occupational Health service of their freedom from infection in line with this national guidance. No appointment will be made in the absence of such evidence. EPP workers with previous EPP clearance prior to November 2025, may require further clearance in line with this updated guidance, so should submit details of previous clearance in line with section 9 of this form. The guidance is available here https://www.hpsc.ie/a-z/bloodbornevirus/ Detailed information on those categories of staff and procedures coming under the scope of the EPP definition is available from the Area Recruitment Unit. If there is any doubt about whether the post you have identified above comes within the definition of an EPP post, expert advice should be sought from the Occupational Health Service.
