Core Behaviours and our Chosen Culture in CHI	Core Behaviours of our Chosen Culture

Organisational culture is not a static concept. It is dynamic and lived—reflected in how we interact with each other, how we care for patients, how we respond to challenges, and how we lead. It influences the quality of care, the wellbeing of our workforce, and the public's confidence in our services. Creating and maintaining a positive culture is the responsibility of every one of us.

The behaviours detailed within the pillars in the image below, are how we reflect four key aspects of our chosen culture: How we partner with patients, service users and public, how we pause to self-reflect, how we interact with our colleagues and how we compassionately lead. A consensus on our core behaviours is the starting point for establishing and implementing our shared values.

Values and Behaviours are the foundation of how we deliver health and social care. A consistent, practical framework helps everyone in the health service act in ways that reflect our shared culture and mission.

Living these Behaviours is how we express our desired culture to those we serve. When applying these behaviours, we consider these statements and how they translate for CHI employees, in their day to day work.
